Credit Will Complete the Set

Spring cleaning makes conspicuous a lack of furniture. When everything is set in order the completed set of furniture looms up with mortifying distinctness.

Why not fill up the gaps right now? It is bad judgment and bad business to put off the purchase till another year, for it will cost just as much then and meantime you are losing a year of usefulness.

You can fill in the missing pieces on credit and enjoy the luxury of a completely furnished home.

Our credit arrangements make this possible no matter how hard pressed you are for cash at present, for we require no immediate payment.

Credit Will Add Years of Comfort to Your Calandar

Life is only just so long, and the man who skimps along for years with a half-furnished home is denying himself just so many years of comfort.

Buying your furniture on credit now is just the same as saving up to buy it except that you can enjoy it while you save. That means you get more for your money-extra years of comfort added to your calendar of life.

These extra years are doubly insured by the sturdy quality of our furniture on credit. We guarantee the pieces to last well into the second generation.

A Set Suggestive of Delicate Refinement

The dining room presents a problem distinct from that of any other room in the house. It is the room where the family and their friends gather to partake in a sociable manner of their daily meals and as such demands delicacy in furniture and taste in treatment in close harmony with this

The set illustrated above is only one of a group of delicate period styles now on the floor of our show rooms. Their daintiness of line and treatment is inviting to the appetite and to the aesthetic eye while their well ranged pricings are inviting to the purse which must be economically managed. Your inspection will be welcomed.
